Noboribetsu Muroran

Muroran City

Jozankei Gorge Area

Fresh Verdure and Autumn Colors Adorning the Valley

Jozankei Gorge Hot Spring, along with Noboribetsu, is one of the best examples of hot springs in Japan. The region stretching along the Toyohira River is known for beautiful valleys and colourful foliage in the fall, and the surrounding mountains are destinations for relaxation and refreshment for Sapporo citizens.

Lake Shikotsu Area

Water Color that Fascinates the Tourists

The crystal clear water of Lake Shikotsu is most impressive. It is surrounded by the rich greenery of Mount Eniwa and Mount Fuppushi, with the lava dome of Mount Tarumae on the south shore adding a special character. Although located not far from New Chitose Airport (about 20km), it is the area with the highest natural quality within the park.

Noboribetsu Area

Blessed with Abundant Hot Springs

Noboribetsu Hot Spring, with its abundant yield of hot water and diverse spring qualities, is a perfect example of hot springs in Japan. Mount Hiyori and Jigokudani Vally (Valley of Hell), both of which fuming with smoke lie to the rear, and crystal clear waters of Lake Kuttara surrounded by forests stretch to the east.
